# Administrator

The user of the Administrator account has access to all features of the Web-client:

- viewing registered documents, requests, rejections, statements, daily reports etc;
- working with documents in the registry of contracts;
- preparing, editing, sending documents;
- working with master agreements;
- converting formats;
- validation.

Functions that the user performs depend on the type of the repository participant.

There are three types of participants

- Parties (parties of the master agreement);
- Basic reporting agents (hereinafter BRAs);
- Reporting agents (hereinafter RAs).

Functions of the participants are described in Table 1.

**Table 1 – Functions of the Repository participants**

| Participant type | Functions |
|---|---|
| Party | Registration of master agreements<br>Sending requests to the repository<br>Getting the repository's mandatory daily reports<br>Generation of requests for statements<br>Browse the repository registry |
| BRA | Registration of master agreements<br>Sending requests to the repository<br>Getting the repository's mandatory daily reports<br>Generation of requests for statements<br>Viewing the repository registry |
| RA | Reporting on contracts concluded under a master agreement to the repository<br>Checking imported messages for compliance with the NSD document format<br>Amendments to the contract and registration of changes<br>Receiving the statement from the contract registry from the repository |

The client can simultaneously perform different roles in relation to other members of the repository. For more information about the participants of the repository and the delimitation of their roles can be found on the NSD website.
