

Margin calculator / -

OptionWorkshop . , , .  (. 1).

The image shows a software interface for managing positions. At the top, there's a 'Positions' title bar. Below it, a navigation bar includes 'Accounts', 'Strategies', and a 'Chart' tab which is currently selected. To the right of the tabs is a 'Margin 5.00' button, which is circled in red. The main area is divided into two panes. The left pane, titled 'Account1', lists several accounts: AAPL, GOOG, AGG, GC, AAON, and GAZR. The right pane, titled 'GZH6', shows a table of positions. The table has columns for 'Q' (Quantity), 'Type', 'Strike', 'Instru...' (Instrument), 'Exp' (Expiration), 'Vola' (Volatility), 'Price', 'Theo' (Theoretical), 'P&L', 'ΣDelta', 'ΣGam...' (Sigma Gamma), 'ΣVega', and 'ΣTheta'. The first row of the table is highlighted in orange and shows 'GZZ5' with a quantity of 5, an index type, and a strike of GAZR. The second row shows a quantity of 0 with a red 'X' in the 'Q' column. The third row is empty.
