

Updating a root certificate

To update a root certificate of Moscow Exchange:

1. Download the update file (**UpdateRSA-2015.pse**) from the [Moscow Exchange website](#) on your computer to any folder.
2. Close all applications that use RSA certificates;
3. Run Certificate store using a key carrier (the Start menuAll ProgramsMOEX EDI CryptoPS – Certificate store);
4. Select Certificate storeUpdate object;
5. In the opened window specify the folder where the **UpdateRSA-2015.pse** file is located, and click the **OK** button;
6. Backup stores by selecting Service Backup stores.

If you have several profiles in Certificate store, you need update a root certificate of Moscow Exchange for each profile.
