File decryption

Once a client has provided all necessary information to access the Web-client (see Obtaining access to the Web-client), he receives an email with the URL-address of the Web-client and an encrypted file containing the login and password to the technical administrator's account. This file must be saved to a secure folder, and then decrypted. To do this:

1. right-click on the file and select **MOEX EDS PKZI** or **MICEX APK Client**(depending on the type of cryptography) from the context menu (. 1,1)**D** ecrypt (Fig. 1,2);

	Open with		
1	MOEX EDI CryptoPS (x64)	₽₽	Create signature
	Share with	• %	Verify signature
	Send to	- 🔒	Encrypt
	Cut	2 🖉	Decrypt
	Сору	•	File info
	Create shortcut	-	Show personal certificate
	Delete	2	Unload key
	Rename	0	More
	Properties		

Fig. 1 – file decryption

As a result, the folder with the original file will also contain the file log_Pass.bt, certified with electronic signature (hereinafter DS) of the IT Global LLC . The DS allows client to validate the sender;

 right-click on the file log_Pass.txt and select MOEX EDS PKZI or MICEX APK Client (depending on the type of cryptography) from the context menu (Fig. 2,1) Check and delete (Fig. 2,2);

Fig. 2 - checking DS

This will open the confirmation window, where you should click OK to delete DS (Fig. 3).

Fig. 3 – Delete DS

Fig. 4 - results of DS check

After that you will see an informational message about the result of DS check, where you need to click OK (see Fig. 4). This will display a text file

log_Pass with the login and password to the technical administrator's account.
