

Authentication in the Web-client

To login into the Web-client the user needs to enter its URL in a browser's address bar and go to the authentication form (Fig. 1). The bottom panel contains buttons which allow you:

- to go to the website of the Web-client's documentation (Fig. 1,2);
- to call the form which contains the contacts of the technical support of IT Global and NSD (Fig. 1,2);
- to go to the website of the [NSD's trade repository messages specifications](#) (Fig. 1,2);
- to switch between versions of the Web-client ([more...](#)) (Fig. 1,3).

Next the user must fill in credentials and click **Sign in** button. At user's authentication the certificate is being verified automatically.

 Web account URL for testing: <http://repository1.itglobal.ru/lkr>

 Web account URL for the production profile: <https://cabinet.nsd.ru/repository/>

 After 5 unsuccessful attempts to enter the web account, the login form gets locked. After 5 minutes, the form will be unlocked automatically.

. 1 – user Authentication

In case of successful authentication the main application form will be shown (Fig. 2).

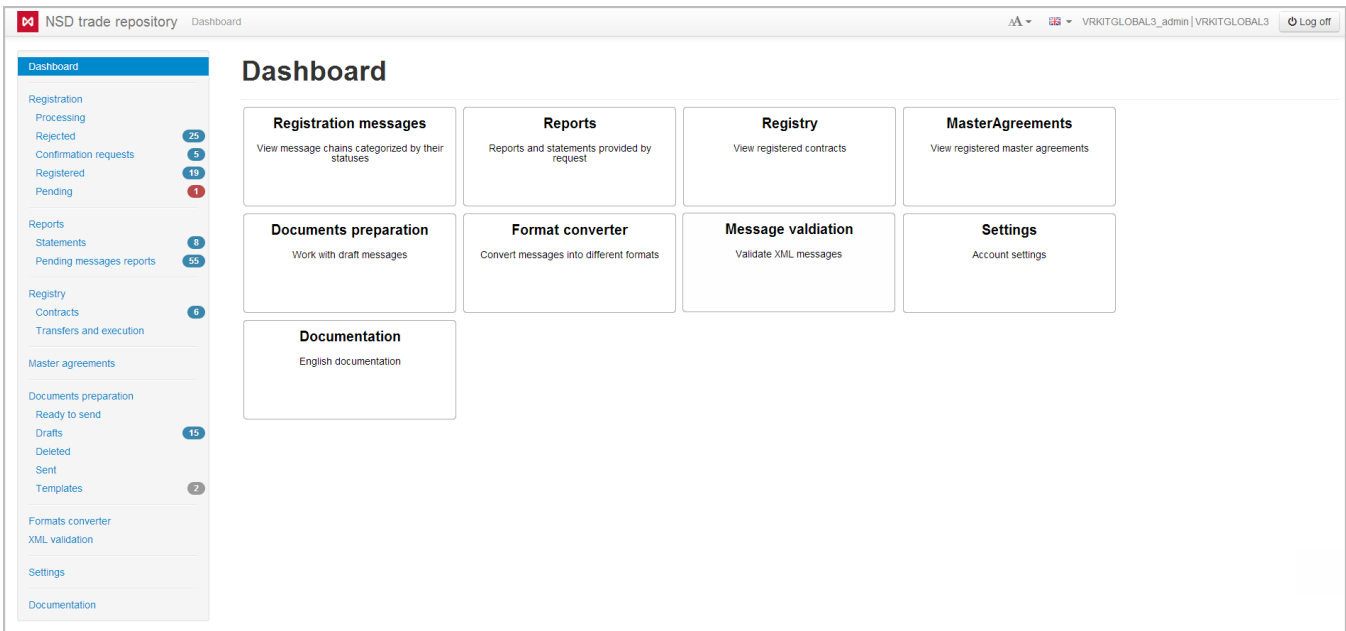

Fig. 2 – main web account page

At first login into the system, user will be asked to change password to ensure system security. For instructions on how to change password, see section [Account Password Settings](#). An encryption certificate, which is used for encrypting messages transmitted to the repository, will be installed automatically.

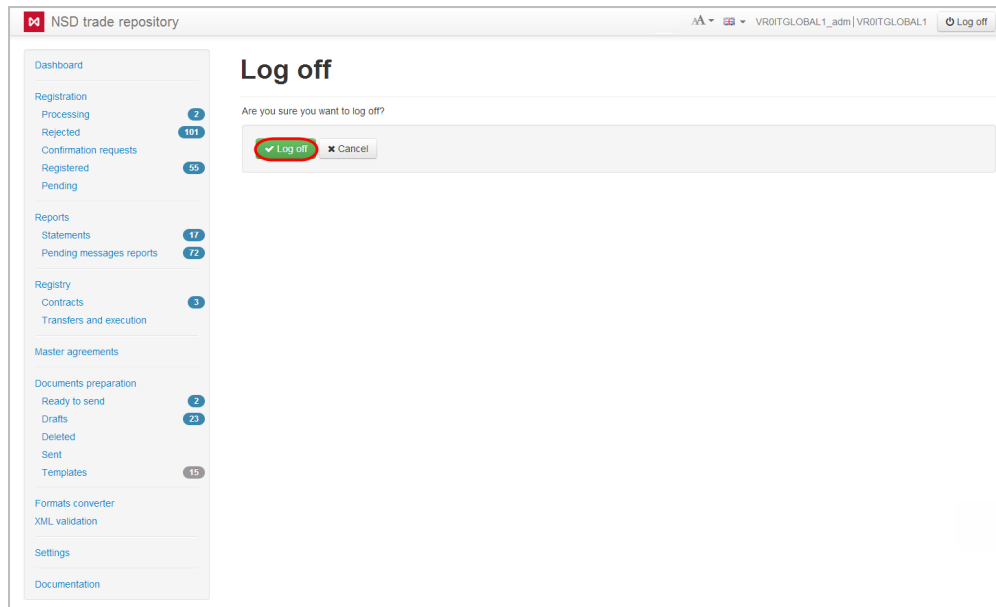

Fig. 3 – logout confirmation

As a result, you will be redirected to the user authentication form (see Fig. 1). Also the logout will occur automatically if the user has been idle in the system for over an hour.
